3 Tips for Luscious Lilacs:

Plant in Full Sun

Lilacs need at least 6 hours of direct sunlight for the most blooms. Too much shade leads to fewer flowers and more leggy growth.

Plant in Well draining soil

Lilacs prefer well-drained soil. Add **Home & Garden Excellence Tree & Shrub mix** when planting to add extra nutrients to the soil. For planting tips please check out our guide "HERE"

Prune Right after blooming

Lilacs set buds for next year soon after flowering so prune right after flowers fade (late spring, early summer). Remove finished flowers and thin out older stems to promote airflow and prevent disease. Avoid heavy summer or fall pruning as it will reduce next year's blooms.
