FRUIT TREES

CEDARRIM.COM • 604.888.4491 • 7024 GLOVER RD, LANGLEY

CHOOSING YOUR FRUIT TREE:

When choosing your fruit tree there are 5 factors you will want to consider:

#1. Mature Height:

Semi- Dwarf: 12-16'

Dwarf: 8-12'

Extreme Dwarf: 6-8'

#2. Pollination Requirements: Some varieties require a Pollinizer to produce fruit. For example if you have a Empire Apple tree you will need another apple that blooms at the same time (mid-season) to pollinate the Empire apple tree. In this case you could use a Yellow Delicious apple. (Please note Apples will not pollinate other fruit trees such as Cherries and European Plums will not pollinate Japanese Plums.)

#3. Diseases: Like all plants fruit trees are susceptible to a wide variety of insect and disease problems. To prevent these problems Dormant Oil should be applied to the trees in the winter months (December to February) before the tree begins to leaf out in spring. It is extremely important that you follow the directions given with the dormant oil kit you purchase.

#4. Pruning: For detailed directions on how to prune your fruit tree watch our pruning video located at

#5. Fertilizing: It is not recommended that you fertilize your fruit tree the year it has been planted. The second year you should fertilize with a specialized Fruit Tree fertilizer in the spring and summer.

Follow our Planting Guide for successful planting tips

Apples

Name	Type	Requires Pollinizer	Fruiting Time	Blooming Time	Information
Akane	Semi-Dwarf Extreme-Dwarf	No	Mid	Mid	Good dessert apple. Flesh is crispy & juicy. Bears well in colder climates.
Ambrosia	Semi-Dwarf	Yes	Mid-Late	Early-Mid	An attractive medium-sized apple, with a pink-tinged orange/red flush over a yellow background. Good for salads.
Beni Shogun Fuji	Semi-Dwarf Extreme-Dwarf	Yes	Mid	Mid	Crisp, juicy and very sweet. Beautiful red colour.
Braeburn	Semi-Dwarf	No	Late	Mid	Great for cooking or making cider. Fruit keeps well. Susceptible to scab, mildew & fire blight.
Bramley's Seedling	Semi-Dwarf	Yes	Late	Mid	Very sour which makes it great for pies and other baking.
Carroll	Dwarf	Yes	Late	Mid	A crisp, sweet-tart apple, great for fresh eating. Hardy and productive, it performs best with cross-pollination.
Chehalis	Extreme-Dwarf	No	Mid to late	Early	Yellow fruit very similar to Golden Delicious. Sweet tasting & good for fresh eating or cooking. Fruit can store for up to 3 months.
Cortland	Semi-Dwarf	Yes	Mid	Mid	This apple tree requires pollination from another variety with the same bloom period.
Cox Orange Pippin	Semi-Dwarf	Yes	Late	Late	Medium-sized, orange red over deep yellow. Flesh is firm and aromatic.
~~Early Pink-Lady~~	~~Semi-Dwarf~~	~~Yes~~	~~Early~~	~~Mid~~	~~Exceptional flavour! Best for fresh-eating. Fruit ripens 2-4 weeks before "Pink Lady".~~
Elstar	Dwarf	Yes	Mid	Mid	A juicy, sweet-tart apple with excellent flavor for fresh eating or desserts. Performs best with cross-pollination.
Florina	Semi-Dwarf	No	Mid to Late	Mid to Late	Medium to large fruit with a colour of purple-red over yellow.
Fuji	Semi-Dwarf Extreme-Dwarf	Yes	Mid to Late	Mid	Crisp, very juicy, sweet flesh
Fuji Red Sport	Dwarf	Yes	Late	Mid	A crisp, very sweet apple with dense flesh, excellent for fresh eating and storage. Benefits from cross-pollination for best yields.

~~Gala~~	~~Semi-Dwarf~~	~~Yes~~	~~Mid to Late~~	~~Mid to Late~~	~~Bright scarlet stripe over yellow. Excellent quality, sweet and keeps well. Mildew resistant.~~
Golden Delicious	Semi-Dwarf	No	Mid	Mid	A very popular as a supermarket apple variety, and now undergoing something of a rehabilitation amongst apple enthusiasts.
Golden Gala	Dwarf	Yes	Mid to late	Mid	A sweet, aromatic apple with crisp flesh, perfect for fresh eating and salads. Cross-pollination improves fruit set and yield.
Golden Reinette	Dwarf	Yes	Late	Mid	A classic dessert apple with firm, sweet-tart flesh and rich flavor. Best results come from cross-pollination with another apple variety.
Golden Sentinel	Columnar	Yes	Mid	Mid	Produces lusters of large, juicy, golden-yellow fruit.
Goodland	Semi-Dwarf	Yes	Mid to Late	Mid to Late	The yellow and red colored fruit has white, crisp flesh and is very aromatic. Goodland makes the perfect apple sauce!
Granny Smith	Dwarf	No	Mid	Mid	Crisp, hard apple that is great for fresh eating or baking. On
Gravenstein	Semi-Dwarf Extreme-Dwarf	Yes	Mid	Mid	One of the top selling Apples on the market. Deep yellow skin with red stripes. Great for eating fresh or in desserts. Ripens in August.
Honeycrisp	Dwarf	Yes	Mid	Mid	Large, crisp, juicy red apples. Apples store well. Very disease resistant.
Jonafree	Dwarf	Yes	Mid	Mid	Firm, with creamy yellowish flesh and strong apple flavour.
Jonagold	Semi-Dwarf Extreme-Dwarf	Yes	Mid to late	Mid to late	Great dessert apple. Flesh is crisp & juicy with a honeyed flavour.
Jonathan	Dwarf	Yes	Mid	Mid	A tangy, aromatic apple with firm, juicy flesh, ideal for fresh eating, baking, and cider. Performs best with cross-pollination.
King	Semi-Dwarf	Yes	Late	Mid	Very large red fruit with juicy and sweet, white flesh. Good for baking. Vigorous and productive producer.
Liberty	Semi-Dwarf Extreme-Dwarf	Yes	Mid to Late	Early	Most disease resistant Apple. Great for fresh eating or cooking. Stores till February. Disease resistant.
Lobo	Dwarf	Yes	Mid	Mid	A juicy, sweet-tart apple, excellent for fresh eating and cooking. Best fruit set is achieved with cross-pollination.
Lodi	Semi-Dwarf	Yes	Early	Late	An early-season apple variety known for its tart flavor and excellent use in sauces and baking.

Lucy Gem	Semi-Dwarf	Yes	Mid	Mid	Unique with their yellow skin featuring red striping and possess complex berry-like flavors.
Lucy Glo	Semi-Dwarf	Yes	Late	Mid	Lucy Glo is a cross between a Honeycrisp and Airlie Red Flesh Apples
Macoun	Semi-Dwarf	Yes	Late	Mid to Late	Medium size variety and when ripe have a deep red to purple or almost black hue and an often irregular shape.
Melba	Semi-Dwarf	Yes	Early	Mid	A tender, sweet-tart apple with aromatic flavor, great for fresh eating and sauces. Cross-pollination improves yield and fruit quality.
Melrose	Extreme-Dwarf	No	Mid Oct	Mid	Green skin with red blush and crisp, juicy white flesh. Vigorous and productive. Great for cooking. Apples store well.
~~Mutsu~~	~~Dwarf~~	~~Yes~~	~~Late~~	~~Mid to Late~~	~~Large yellow apples with crispy flesh. Vigorous producer. Grows well in coastal locations.~~
Northern Spy	Dwarf Semi-Dwarf	Yes	Late	Late	Large red apples. Fruit stores extremely well. Vigorous producer.
~~Pink Lady~~	~~Semi-Dwarf~~	~~Yes~~	~~Early~~	~~Mid~~	~~Sweet-tart. Bright white flesh that is slow to oxidize (in other words, slow to brown)~~
Pink Pearl	Semi-Dwarf	Yes	Early to Mid	Early	Delicious apple that is crisp with a pronounced unique fruity flavour and a nice blend of sweetness and sharpness.
Prima	Dwarf	No	Early	Early to mid	Prima is an early-ripening, sweet-tart apple with crisp flesh, ideal for fresh eating. Its disease-resistant nature makes it low-maintenance in the orchard.
Red Chief	Dwarf	Yes	Late	Mid	Red Chief is a sweet, crisp apple with firm flesh, excellent for fresh eating and long-term storage. Cross-pollination ensures better fruit set and yield.
Red Delicious	Semi-Dwarf	Yes	Early-mid	Early-mid	Large red, juicy & sweet. Excellent for fresh eating.
~~Red Free~~	~~Semi-Dwarf~~	~~Yes~~	~~Late~~	~~Late~~	~~Great for fresh eating with a pleasant, mildly sweet flavour and softer yet crisp flesh.~~
Red Gravenstein	Dwarf	Yes	Early	Mid	Red Gravenstein is a crisp, tangy apple with rich flavor, ideal for fresh eating, baking, and sauces. Benefits from cross-pollination for optimal fruit set.

~~Red McIntosh~~	~~Semi-Dwarf~~	~~No~~	~~Mid~~	~~Mid~~	~~Red and green striped skin. Tart flavour. Great for fresh eating or baking. Very hardy.~~
Red Northern Spy	Dwarf	Yes	Late	Mid	A crisp, sweet-tart apple with excellent flavor for fresh eating, baking, and cider. Cross-pollination improves yield and fruit quality.
Rosey Glow	Dwarf	Yes	Early	Early	Best early apple. Bright red skin with yellow blush. Great for fresh eating and cooking.
Royal Gala	Dwarf	Yes	Early to mid	Mid	A sweet, juicy apple with thin skin and crisp flesh, perfect for fresh eating. Cross-pollination improves fruit set and overall yield.
Scarlet Sentinel	Columnar	Yes	Late	Mid	Large greenish-yellow and red apples that are very crisp and juicy with white flesh.
Shamrock	Dwarf	Yes	Late	Early	Flesh is creamy light green and has a coarse texture with a sprightly flavor similar to McIntosh.
Shizuka	Dwarf	Yes	Late	Mid	A sweet, crisp apple with juicy flesh, excellent for fresh eating. Cross-pollination with another apple variety enhances fruit set and quality
Smoothee Golden Delicious	Dwarf	Yes	Mid to late	Mid	A sweet, crisp apple with smooth flesh, ideal for fresh eating and desserts. Cross-pollination enhances fruit set and quality.
~~Snowsweet~~	~~Semi-Dwarf~~	~~Yes~~	~~Mid~~	~~Late~~	~~Delightfully sweet. White flesh is very slow to oxidize and turn brown after cutting.~~
Spartan	Semi-Dwarf Extreme-Dwarf	No	Late	Mid	Red skin with crispy, juicy, delicious flesh. Fruit keeps well. Can be affected by scab & mildew.
Summered	Dwarf	Yes	Early / Mid	Mid	Fruit is bright red with sweet, crispy and juicy flesh.
Sweet Sixteen	Semi-Dwarf	Yes	Mid	Mid to Late	Medium-sized apple with red skin and occasional yellow-green striping.
Urban Blushing Delight	Columnar	Yes	Mid	Early	Red to yellow and fruit in the first year.
Urban Golden Treat	Columnar	Yes	Early/ Mid	Early/Mid	Produces huge amounts of golden fleshed, crisp, tart Apples in late August.
~~Urban Tangy Green~~	~~Columnar~~	~~Yes~~	~~Mid~~	~~Early to Mid~~	~~Crisp texture, lime green color and a sweet/tart flavor~~
Urban Tasty Red	Columnar	Yes	Early to Mid	Early to Mid	Bright-red fruit on a narrow, upright tree.

Vista Belle	Dwarf	Yes	Early	Early	Pleasant balance of sweet and sharp, and for such an early apple, is incredibly juicy.
Yellow Delicious	Dwarf	No	Mid	Mid	Golden yellow skin. All purpose apple. Sweet, full flavoured fruit.
Yellow Transparent	Dwarf	Yes	Early	Early to mid	A tart, juicy apple that ripens early, making it ideal for cooking, sauces, and early fresh eating. Cross-pollination improves fruit set.
Zestar	Semi-Dwarf	Yes	Early	Early	Crisp & juicy with an excellent sweet-tart flavour.

Cherries

Name	Type	Requires Pollinizer	Blooming Time	Information
~~Angela~~	~~Dwarf~~	~~Yes~~	~~Mid~~	~~Large, black fruit. Resists cracking and diseases.~~
~~Bing~~	~~Dwarf~~	~~Yes~~	~~Mid~~	~~Deep, dark sweet cherries high in antioxidants~~
~~Black Gold~~	~~Dwarf~~	~~No~~	~~Late~~	~~Bears heavy crops of deep red, heart-shaped cherries.~~
Black Tartarian	Semi-Dwarf	Yes	Late	You'll get delicious cherries in one year, adaptability to various soil types and drought tolerance for ease of growth.
Carmine Jewel	Dwarf	No	Mid	Large, purplish-red fruit. Great for fresh eating or baking.
Crimson Passion	Semi-Dwarf	No	Mid	Produces large, dark red cherries, among the largest in the Romance series.
Early Burlat	Dwarf	Yes	Mid	The fruit is medium–large, rounded with red skin and flesh.
Evans	Dwarf	Yes	Mid	Produces cherry red round fruit which are usually ready for picking in mid summer.
Glacier	Dwarf	No	Mid	Large, dark cherries. Great for fresh eating or baking.
Kirstin	Dwarf	Yes	Mid	Large purplish-black fruit that is crack-resistant. Best for fresh eating.
~~Lapin~~	~~Dwarf~~	~~No~~	~~Mid~~	~~Large, dark red, sweet fruit. Highly split resistant.~~
Mesabi Cherry	Semi-Dwarf	No	Early	Sweeter than most tart cherries due to its 'Bing' parentage, making it versatile for both fresh eating and culinary uses.
Montmorency	Dwarf	No	Late	Very reliable sour Cherry. Small, bright red, fruit.
Morello	Dwarf	No	Late	Dark red cherries with a sharp flavour. Great for cooking, jams or jellies.
North Star	Dwarf	No	Mid	Medium-sized cherries with deep red skin and dark red flesh

Rainier	Dwarf	Yes	Early	Golden yellow sweet cherries with a red blush. Resistant to cracking.
Royal Ann	Dwarf	Yes	Early	Light yellow cherries with pink blush.
Sam	Dwarf	Yes	Early	Large, black fruit. Highly resistant to cracking.
Skeena	Dwarf	Yes	Mid	Large, dark red fruit, excellent flavour, and good resistance to cracking.
Stella	Dwarf	No	Late	Large, sweet black fruit. Very sweet.
Surefire	Dwarf	No	Late	Produces crack-resistant crops bright red fruit
Sweetheart	Dwarf	No	Late	Bright red, sweet fruit. Developed in BC.
Tehranivee	Dwarf	No	Early	Mahogany-colored, self fertile sweet cherry with black-red juice.
Van	Dwarf	Yes	Early	Very heavy producer with shiny black fruit.
Vandelay	Dwarf	No	Mid	The fruit is dark red and very sweet

Apricots, Nectarines, Peaches & Plums

Apricots

Name	Type	Requires Pollinizer	Blooming Time	Information
Harcot	Dwarf Semi-Dwarf	No	Mid	Sweet, juicy, rich flavour. Great for jams and jellies.
Puget Gold	Semi-Dwarf	No	Early	Small and yellow, consistent bearer in the Puget Sound area, tolerant to disease
Scout (New)	Semi-Dwarf	Yes	Early	Golden fruit with a read blush, tender, sweet and juicy
Tilton	Semi-Dwarf	No	Early	Best Variety for freezing, drying and canning.
Wenatchee Moorpark	Semi-Dwarf	No	Early	Very heavy producer. Large yellow/ orange fruit. Good for drying and canning.

Nectarines

Name	Type	Requires Pollinizer	Fruiting Time	Information
Fantasia	Semi-Dwarf	No	Late	Bright yellow fruit with heavy red blush. Vigorous and productive.
Flavortop	Semi-Dwarf	No	Mid	Fruit that is yellow fleshed and firm. Very vigorous producer.
Hardy Red	Semi-Dwarf	No	Early	Hardy Red is productive, reliable and disease-resistant (especially to bacterial spot and brown rot) making it easy to grow
Harko	Semi-Dwarf	No	Mid	Very vigorous producer. Great for Northern Climates. Fruit is sweet & juicy and cans well.

Peaches

Name	Type	Requires Pollinizer	Fruiting Time	Information
~~Elberta~~	~~Semi-Dwarf~~	~~No~~	~~Mid~~	~~Large golden fruit, sweet juicy flesh, and excellent flavour for fresh eating or preserving.~~
~~Frost~~	~~Semi-Dwarf~~	~~No~~	~~Mid~~	~~Medium sized fruit with bright yellow skin. Heavy producer. Leaf curl resistant.~~
~~Galaxy~~	~~Semi-Dwarf~~	~~No~~	~~Late~~	~~Vigorous tree bears large, unique-looking fruit that decorates its branches. The fruit's soft, blushed-red skin surrounds a smooth and firm white flesh~~
~~Pacifica Gold~~	~~Semi-Dwarf~~	~~Yes~~	~~Early~~	~~Smooth yellow fruit with sweet, juicy flesh and is an excellent early-season plum for fresh eating~~
~~Red Haven~~	~~Semi-Dwarf~~	~~No~~	~~Mid~~	~~Sweet, yellow fruit with red blush. Excellent for fresh eating or canning. Resistant to leaf spot. Freestone when fully ripe.~~
~~Reliance~~	~~Semi-Dwarf~~	~~No~~	~~Mid~~	~~Medium yellow fruit with a red blush. Sweet, mild flavour. Great for colder climates.~~
~~Veteran~~	~~Semi-Dwarf~~	~~No~~	~~Mid~~	~~Golden yellow skin with red blush. Freestone.~~
~~White Lady~~	~~Semi-Dwarf~~	~~Yes~~	~~Mid~~	~~Large, sweet white-fleshed plum with crisp texture and excellent flavour for fresh eating or preserves~~

Plums (European)

Name	Type	Requires Pollinizer	Fruiting Time	Information
Blue Damson	Semi-Dwarf	No	Late	Small, purple plums with green flesh. Excellent for preserves and jams.
Brooks	Semi-Dwarf	No	Miid	Excellent eating prune. Keeps well.
Green Gage	Semi-Dwarf	No	Mid-Late	Greenish yellow fruit with amber flesh. Sweet. Great for fresh eating or cooking.
Italian Prune Plum	Semi-Dwarf	No	Mid- Late	Medium-sized purple-black fruit. Excellent fresh, canned or dried.
Seneca	Semi-Dwarf	No	Mid - Late	Large reddish/blue fruit. Juicy and sweet.
Stanley	Semi-Dwarf	No	Late	Large, purple skinned fruit with yellow flesh. Very sweet. Good for canning.
Yellow Egg	Semi-Dwarf	No	Mid	Large, bright yellow fruit with yellow flesh. Very sweet. Freestone

Plums (Japanese)

Name	Type	Requires Pollinizer	Fruiting Time	Information
Beauty	Semi-Dwarf	No	Early	Bright red plums with exceptional flavour.
Methley	Semi-Dwarf	No	Early	Reddish-purple fruit with red flesh. Very sweet.
Nadia	Semi-Dwarf	Yes	Mid	Incredible new introduction. A plum and cherry hybrid! Dark red fruit. That is high in anti-oxidants. Stores well.
Satsuma	Semi-Dwarf	Yes	Mid	Medium sized, dark red fruit. Very sweet.
Shiro	Semi-Dwarf	No	Early	Large, golden-yellow fruit with yellow flesh. Performs best with polinator

Pears

Name	Type	Requires Pollinizer	Fruiting Time	Information
Anjou	Semi-Dwarf	Yes	Mid-Late	Yellow skin fruit with white flesh. Fruit stores well.
Bartlett	Semi-Dwarf	Yes	Mid	Large, richly flavored fruit is thin-skinned, sweet and tender. Excellent eaten fresh or for canning.
Bosc	Semi-Dwarf	Yes	Mid	Medium to large fruit. Long-necked with a fine flavour.
Clapp's Favourite	Semi-Dwarf	Yes	Early	Medium sized juicy, sweet fruit. Best for fresh eating.

Comice	Dwarf Semi-Dwarf	Yes	Mid	Large, yellow fruit with a thick skin. Best when stored for 1-2 months.
Conference	Semi-Dwarf	Yes	Mid-Late	Medium sized golden fruit. Sweet and spicy flavour.
Flemish Beauty	Semi-Dwarf	Yes	Mid	Yellow with red blush. Great for canning. Fruit best ripened off the tree.
Golden Spice	Semi-Dwarf	Yes	Late	Produces yellow oblong pears with a red blush and white flesh which are usually ready for picking from late summer to early fall.
Highland	Semi-Dwarf	Yes	Early	A hardy and productive dessert pear producing large yellow fruit with smooth, juicy flesh and a rich, sweet flavour.
Luscious	Semi-Dwarf	Yes	Early	Sweet, juicy, and soft, making them excellent for fresh eating and desserts.
~~Maxie~~	~~Dwarf~~	~~Yes~~	~~Mid to Late~~	~~A unique cross between a European and Asian Pear. Can be eaten at different stages of ripeness.~~
Moonglow	Semi-Dwarf	Yes	Mid	Large yellow fruit that stores well. Very vigorous grower. Blight resistant.
Orcas	Semi-Dwarf	Yes	Early-Mid	Large yellow pear with red blush. Good for canning and drying.
Parker	Semi-Dwarf	Yes	Early	Medium to large fruit, sweet, making them excellent for fresh eating and canning.
Patten	Semi-Dwarf	Yes	Mid	Large Fruit, yellowish-green, sweet, excellent for eating and canning.
Reddy Robin	Semi-Dwarf	Yes	Late	A unique, eye-catching Asian pear with attractive red-blushed skin and crisp, juicy fruit with a deliciously sweet flavour.
~~Red Bartlett~~	~~Semi-Dwarf~~	~~Yes~~	~~Mid~~	~~Medium to large fruit, deep red when ripe, sweet and tender, excellent for fresh eating and canning~~
Red Clapp's	Semi-Dwarf	Yes	Mid	Medium sized red pears with yellow flesh. Very sweet.
Rescue	Semi-Dwarf	Yes	Early to Mid	Yellow with a bright red-orange blush. Flesh is sweet, smooth and juicy.
~~Summercrisp~~	~~Semi-Dwarf~~	~~Yes~~	~~Early to Mid~~	~~This early cold-hardy pear has a really sweet, pleasant flavour and is not gritty or dry.~~

Pears (Asian)

Name	Type	Requires Pollinizer	Fruiting Time	Information
Ari Rang	Semi Dwarf	Yes	Late	Arirang is a Korean pear and one of the best, late ripening varieties.

Chojuro	Semi-Dwarf	Yes	Mid	Medium, brown skinned, crisp, sweet fruit.
Hosui	Semi-Dwarf	Yes	Mid to Late	Large gold, fruit with crisp sugary white flesh. Stores well.
Kousi	Semi-Dwarf	Yes	Mid to Late	Large, brown skinned fruit. Sweet-spicy flavour. Disease resistant.
Nijisseiki	Semi-Dwarf	Yes	Mid	Meidum sized green-yellow fruit. Crisp and juicy flesh.
~~Shinseiki~~	~~Semi-Dwarf~~	~~Yes~~	~~Late~~	~~Medium sized, yellow skinned, crisp and juicy fruit.~~

Combination Fruit Trees

Name	Type	Varieties (Combinations will vary between trees)
Apple - 4 Way Combo	Semi-Dwarf	Akane, Braeburn, Chehalis, Fuji, Gala, Honeycrisp, Liberty, Red Macintosh, Spartan
Apple Espalier	3 Tier Espalier	Akane, Gala, Fuji, Honeycrisp, Liberty
~~Cherry - 3 Way Combo~~	~~Semi-Dwarf~~	~~Bing, Glacier, Lapin, Rainier, Royal Ann, Van~~
~~Cherry – 4 Way Combo~~	~~4 Way Combo~~	~~Bing, Rainier, Van, Montmorency, Stella, Sweetheart~~
~~Fruit Cocktail~~	~~4 Way Combo~~	~~Frost Peach, Puget Gold Apricot, Hardy Red Nectarine, Stella Cherry, Italian Prune Plum, Lapin Cherry, Rainier Cherry~~
Fruit Salad	4 Way Combo	Frost Peach, Puget Gold Apricot, Hardy Red Nectarine, Shiro Plum, Italian Prune Plum, Harcot Apricot
Pear - 4 Way Combo	Semi-Dwarf	Anjou, Bartlett, Comice, Flemish Beauty, Red Bartlett, Rescue, Bosc
Pear, Asian – 4 Way Combo	Semi-Dwarf	Chojuro, Nijisseiki, Shinseiki, Shinko, Kosui
Pear, Asian – Espalier	3 Tier Espalier	Chojuro, Shinseiki, Nijiseiki
~~Pear - Espalier~~	~~3 Tier Espalier~~	~~Bartlett, Bosc, Red Bartlett~~
Plum - 4 Way Combo	Semi-Dwarf	Brooks, Green Gage, Italian Prune, Seneca, Stanley, Yellow Egg

Figs Tree Care

Care: Figs require full sun all day to ripen. Roots are greedy, traveling far beyond the tree canopy. Figs are not fruit trees for small spaces. The fine roots that invade garden beds, however, may be cut without loss to the tree. In the Pacific Northwest, we need to grow them in the warmest location possible; against a sunny wall would be best. For container grown plants, replace most of the soil in the tub every three years and keep the sides of the tub shaded to prevent overheating in sunlight. Figs are generally hardy in zones 7-10.

Young fig tees should be watered regularly until fully established. Mulch the soil

around the trees to conserve moisture. If a tree is not getting enough water, the leaves will turn yellow and drop. Drought-stressed trees will not produce fruit and are more susceptible to disease.

Figs must be allowed to ripen fully on the tree before they are picked. They will not ripen if picked when immature. A ripe fruit will be slightly soft and starting to bend at the neck. Harvest the fruit gently to avoid bruising. Fresh figs do not keep well and can be stored in the refrigerator for only 2 - 3 days.

Fig trees are productive with or without heavy pruning. It is essential only during the initial years. Trees should be trained according to use of fruit, such as a low crown for fresh-market figs. Since the crop is borne on terminals of previous year's wood, once the tree form is established, avoid heavy winter pruning, which causes loss of the following year's crop. It is better to prune immediately after the main crop is harvested, or with late-ripening cultivars, summer prune half the branches and prune the remainder the following summer.

Figs

Name	Size Ht.	Information
Beer's Black	2-3'	Great compact growing form. Medium sized violet figs with a reddish-pink interior.
Brown Turkey	10-30'	This plant is self-pollinating so no need for multiple plants. It produces two crops of its delicious edible figs one in the late spring to early summer and the second in the late summer to early fall.
Celeste Magnolia	7-10'	A compact, dependable variety prized for its extra-sweet fruit and consistent harvests. Ideal for small spaces.
Chicago Hardy	8-10'	Chicago Hardy Fig is one of the best choices for cold climates, delivering sweet, purple-brown fruit even after harsh winters.
~~Fignomenal~~	~~2-3'~~	~~Easy to grow, produces fruit year round, great taste~~
GE Neri Everbearing	6-10'	Produces exceptionally large purple skinned figs with sweet reddish flesh.
Kadota	15-25'	A reliable fall harvest of especially sweet, greenish yellow fruit.
Lattarula	10-15'	Yellow fruit with amber coloured flesh. Excellent for cooler areas.
Olympian	8-12'	Very vigorous and productive, producing a strong breba crop on the pervious seasons growth.
Violette de Bordeaux	6-10'	Produces a small abundance of small to medium size purple-black fruit with a very deep red strawberry pulp

Almonds, Jujubes, Mulberries, Persimmons & Nuts

Almonds

Name	Size	Information
~~Halls Hardy~~	~~8-15'~~	~~Large, hard-shell nuts give way to bittersweet kernels.~~
~~Texas Mission~~	~~10-15'~~	~~With pollination support, this tree becomes a reliable heavy producer of hard, well sealed almonds.~~

Jujube

Name	Requires Pollinizer	Information
Lang	Yes	Crisp and flavorful fruit is delicious eaten fresh, dried, or candied.
Li	No	Attractive, easy-to-grow tree: hardy, drought-resistant, virtually pest and disease free. Requires long, hot summer.

Mulberries

Name	Size	Information
Black Beauty	15'	Produces tasty sweet/tart black fruit in August-September.
Contorted	8-10'	A standout ornamental tree with dramatic twisted branches that add year-round interest.
Cooke's Paskistan	20-30'	Produces sweet, dark red to black berries on a vigorous, fast-growing tree, perfect for fresh eating and jams.
~~Illinois~~	~~15-30'~~	~~A hardy, fast-growing tree prized for its long season of sweet, blackberry-like fruit.~~
Pakistan	30-45'	Yields fruit from late Spring through much of Summer
Persian	12-15'	Produces a large, blackberry-like fruit that is dark purple to black.
Persian White	15-25'	A fast-growing tree with sweet, juicy white berries that are excellent for fresh eating, drying, or preserves.
Tea's Weeping	10-15'	Gracefully drooping branches and sweet, dark berries, ideal for small gardens or decorative plantings.

Persimmons

Name	Size	Information
Fuyu Imoto	10-12'	A compact, early-ripening twist on the classic Fuyu! This self-fertile, semi-dwarf tree produces large, sweet, and crisp orange fruit.
~~Fuyu Jiro~~	~~18-20'~~	~~Late midseason. Self fertile. Great fall colour.~~
Hachiya	25-30'	Fruit matures late fall and can stay on the tree until winter, sweet to the taste
Maru	10-12'	In October the fruit ripens to an cinnamon orange color and the flesh a chocolate brown.
Saijo	15-20'	In late fall, the upright, rounded tree adds beauty to the landscape when its green foliage turns brilliant shades of orange, yellow, and red.
Tamopan	20-30'	Extra large golden-red fruit. Very sweet and juicy.

Medlar

This very unique & uncommon fruit forms a small growing tree. Large white flowers adorn this tree in spring. Fruit ripens in mid-late October. Self-fertile.

Name	Size	Information
Breda Giant	6-8'	This self-fertile variety is celebrated for its abundant production of large, 1.5 to 1.75-inch diameter fruits.
Royal	8-10'	a distinctive and productive fruit tree, cherished for its unique fruit and ornamental appeal.

Olives

Name	Size	Information
Arbequina	8-10'	Their small, fleshy olives emerge green before transitioning to a light pink, then ultimately turn glossy black when they've ripened.
Chemlali	25-30'	It is self-pollinating, but the fruit yield increases with cross pollination.
Coratina	40'	Ripening is mid to late season (November-December).
Leccino	12-15'	Known for it's attractive semi-weeping form, its early ripening, large and tasty fruit.

Hazelnuts (Filbert)

Name	Requires Pollinizer	Fruiting Time	Information
Dorris	No	September	It is recognized for its compact growth, disease resistance, and high-quality nuts.
~~Jefferson~~	~~Yes (Theta)~~	~~September~~	~~Large delicious nuts, disease-resistant variety~~
McDonald	Yes (Yamhill, York, Dorris, Wepster, Theta, Felix)	September	The McDonald Hazelnut is an excellent choice for those seeking a high-yielding, disease-resistant variety with superior kernel quality, particularly suited for the blanched kernel market.
~~Wesper~~	~~Yes (York, Felix, Yamhill, McDonald, Jefferson)~~	~~September~~	~~The Wepster Hazelnut is an excellent choice for those seeking a high-yielding, disease-resistant variety with superior kernel quality, particularly suited for the confectionery and baking industries.~~
Yamhil	Yes (Jefferson or Gamma)	September	Large delicious nuts, resistant to Filbert blight

Walnuts

Name	Requires Pollinizer	Fruiting Time	Information
Ambassador	No	Late	A cold-hardy walnut prized for its excellent flavor and heavy crops, producing thin-shelled nuts even in colder climates.
Carmelo	No	Mid to Late	Carmelo walnut trees are vigorous and can grow quite large, reaching 40 to 50 feet in height if provided adequate space and time. They produce large, flavorful nutmeats with a light color.
~~Cascade~~	~~Partially Self Fertile (More productive with 2nd variety)~~	~~Mid October~~	~~Nuts are buttery and flavourful, large trees mature at 30 to 40[1]~~
Chandler	Partially Self Fertile (Benefits from cross polination with Franquette, or Cisco)	Late	Renowned for its high-quality, light-colored kernels and high yield. The tree has a moderately vigorous growth habit and is one of the most widely planted walnut varieties globally.
Franquette	No	Late	It produces large, elongated nuts with a rich flavor and is commonly used as a pollinizer due to its late pollen shedding.
~~Manregion~~	~~Partially Self Fertile (More productive with 2nd variety)~~	~~October~~	~~Large easy to crack nuts~~

Chestnuts

Name	Requires Pollinizer	Fruiting Time	Information
~~Colossal Seedling~~	~~Yes~~	~~Early~~	~~A cross of Japanese and European chestnut,good producer~~
~~Nevada~~	~~Yes~~	~~Mid~~	~~A beautiful, large spreading nut tree which features long, tropical looking, glossy green foliage and showy cascades of fragrant, yellow male catkins in mid-summer.~~
